Personal Statement

I am a Frontend / Fullstack Engineer with over 5 years of experience in building and maintaining dynamic, user-centric websites, web applications, and mobile applications. Specializing in Next, React, Node and TypeScript, with deep expertise in WordPress/Elementor solutions. I craft high-performance web apps and pixel-perfect UIs that drive business growth. I'm also proficient in creating Salesforce marketing cloud personalization Solutions.

I am always open to adopting other frameworks, languages, and libraries. I have a strong focus on creating seamless user interfaces from concept to deployment, incorporating proactive feature optimization while leveraging modern technologies. I am passionate about aesthetics, UX/UI design, and delivering intuitive, high-performing digital experiences.

Skills

- Great team player with excellent communication and organizational skills
- Detail-oriented problem solver
- Creative with an eye for design.

Education

Bayero University Kano, Kano
Graduated Dec 2017
Bachelor of Science in Microbiology
